That is correct. There is nothing in my files.

Kristen,

No, there will not be dumpsters, any dirt/sand they dig up gets put back in the holes when they are done. Just may have some of their trucks out on the street for the next day or so.

I also wanted to double check. You mentioned that you have no architectural requests/emails giving notice from the past owners about concrete/foundation work at all for this house at 946 River Landing Dr.?

Thanks,
Alex

Alex, all good on my end. Are they putting a dumpster or anything like that out?

Kristen,

I wanted to let you know that this upcoming Monday (12/8) - Wednesday (12/10) Olshan will be coming to my house to repair my foundation internally and externally, throughout the

whole house there is structural failure (anything below 0.5 in). I am not sure if there is anything you need from me. Below are the plans for what they are going to be doing. The red dots with a C are external pillings and the blue dots with a C are internal pillings that will be added to the slabs of my foundation. I will only be having work done inside of the big and small rectangular bubbles.

<image.png>

If there is anything you need from me to ensure there is no issues with the crew coming in and doing this work, please let me know.

Thanks,
Alex Cash
